Large Data Assessment (Complex Cases)

- ☐ Is there any way to estimate the total volume of the discovery production even though some of it may come later?
- ☐ Will we be able to access all the data?
- ☐ Is any of the data encrypted?
- ☐ Are there specific types of documents that will be irrelevant to our case? (i.e. pictures, executable files, junk emails, etc.)
- ☐ Are there specific types of documents that will be very important to our case? (i.e. emails authored by a particular person, documents created during a specific time period, specific document types such as bank records, etc.)
- ☐ Are there both paper documents that have been scanned and native electronic files?
- ☐ Should we objectively code the scanned documents so that they can be integrated into the native file data set for purposes of searching and organization?
- ☐ Will there continue to be rolling discovery productions?
- ☐ Do we need to look at the entire production?
- ☐ Is there information that the government has not provided that needs to explicitly requested?
- ☐ In what format or formats do you want to request this information?
- ☐ Is there information that is not under the government's control that needs to be obtained from 3rd party sources?
- ☐ In what format or formats is that information currently maintained?

☐ Can we get the third party information in a forensically sound manner so as to ensure proper chain of custody?

☐ Will the documents need to be shared among other counsel?

☐ Does the trial team already have an Evidence Review Platform in their office that could handle the amount and variety of discovery involved?

☐ What is the timeline for completing the review?

Main Checklist

Trial

Trial Execution

Preservation of error, generally

- ☐ Object every time: timely, specific ground, specific relief; get an express ruling
- ☐ State separate grounds separately (hearsay and confrontation; relevance and Rule 403; statutory, state, and federal constitutional)
- ☐ A motion in limine preserves nothing; object when the evidence is offered
- ☐ Running objection: request it and scope it (this witness, this subject, this exhibit); watch for the same evidence arriving elsewhere
- ☐ Excluded evidence: offer of proof, in question-and-answer form when credibility matters, before the charge is read
- ☐ Curable events: object, request an instruction to disregard, move for mistrial; get a ruling at each step
- ☐ Incurable events: the mistrial motion alone preserves the complaint, and review is limited to the mistrial denial
- ☐ Bench conferences and jury communications on the record; object to any failure to record
- ☐ Harm record: state the concrete prejudice and why a lesser remedy would not cure it
- ☐ See the Error Preservation section for the phase-by-phase pages

Trial Execution

Special Problems:

Cop cross-exam

Establish reliability of report

Four principles:*

- ☐ Chronological (if the report says "A, then B," A happened before B)
- ☐ Complete (if it's not in the offense report, you didn't think it important)
- ☐ True (if it's in the offense report, it happened)
- ☐ Literal

Main Checklist

Trial

Trial Execution

Jury charge conference:

- ☐ Read every word.
- ☐ Compare to your pattern charge.
- ☐ Submit requested instructions in writing; get a ruling on each objection and request
- ☐ Unanimity: multiple incidents under one count, or disjunctive offenses? Request election and a unanimity instruction
- ☐ Contested facts about how evidence was obtained? Request the art. 38.23 instruction (requires affirmative evidence putting a material fact in genuine dispute); the statute reaches evidence obtained by an officer or other person, so private-actor violations count
- ☐ Lesser-included offenses: decide, and request on the record

Main Checklist

Trial

Trial Execution

Sentencing

- ☐ PSI reviewed with client; errors objected to on the record
- ☐ Punishment-evidence objections (notice, relevance, Rule 403; extraneous acts require proof beyond a reasonable doubt)
- ☐ Full range of punishment: object if the record suggests the court will not consider it
- ☐ Cumulation/stacking: object to an improper cumulation order
- ☐ Allocution; in murder cases, sudden passion at punishment?
- ☐ Fines, fees, costs, restitution: review the judgment; object to unsupported amounts
- ☐ Back-time credit verified

Main Checklist

Error Preservation

- ☐ Core Rules (every phase) (p. 135)
- ☐ Pretrial (p. 136)
- ☐ Jury Selection (p. 138)
- ☐ Evidence (p. 139)
- ☐ Trial Conduct (p. 141)
- ☐ Jury Charge (p. 142)
- ☐ Punishment and Post-Verdict (p. 143)

Main Checklist

Error Preservation

Core Rules (every phase)

- ☐ Object as soon as the ground appears; name the evidence, the legal ground, and the relief you want
- ☐ A general or "constitutional" objection preserves nothing
- ☐ State each ground separately: hearsay, confrontation, Rule 403, statutory, state constitution, federal constitution
- ☐ Get an express ruling; if the judge refuses to rule, object to the refusal on the record
- ☐ The appellate complaint must match the trial objection
- ☐ No magic words needed: plain English that tells the judge what you want and why you are entitled to it
- ☐ Needs no trial objection: sufficiency of the evidence; absolute requirements; waivable-only rights (object anyway when you can)

Main Checklist

Error Preservation

Pretrial

- ☐ Charging-instrument defects, form or substance: raise before trial or lose them (art. 1.14(b))
- ☐ Amendment of indictment: object before it is allowed; demand the 10 days (art. 28.10)
- ☐ Motion to suppress: plead every ground separately (Miranda; art. 38.22 warnings and recording; art. 38.21 voluntariness; art. 38.23; Fourth Amendment; art. I, sec. 9); establish standing on the record
- ☐ Suppression hearing: demand live testimony, an express ruling, and written findings when voluntariness is contested (art. 38.22, sec. 6)
- ☐ A definitive pretrial ruling carries forward; renew only if trial evidence materially changes the issue
- ☐ Speedy trial: assert it in the trial court and ask for a trial (a dismissal-only request weakens the claim); build the record on delay, reasons, assertion, and prejudice
- ☐ Limitations: forfeitable; move to dismiss before trial (art. 27.08)
- ☐ Competency: any credible suggestion triggers the informal-inquiry duty; put dates and observations on the record; if the court declines to inquire, object and make a bill
- ☐ Continuance: written and sworn, always; an unsworn oral motion preserves nothing beyond a separately pleaded constitutional claim
- ☐ Severance, misjoinder, election: move pretrial when the defect shows on the face of the charge; renew the election demand when the State rests
- ☐ Double jeopardy after mistrial: get the full mistrial record (who requested it, consent, manifest-necessity findings); raise by pretrial habeas before retrial

☐ Bail denial under art. I, sec. 11-d: demand the hearing and counsel; make the State elect and prove its theory; insist on written findings

☐ Art. 28.01 pretrial setting: calendar the seven-day filing cutoff

Main Checklist

Error Preservation

Jury Selection

- ☐ Challenge to the array: written, supported by affidavit, filed before voir dire begins
- ☐ Jury shuffle: demand it before voir dire begins
- ☐ Commitment questions: object by name; when your own proper questions are cut off, proffer the exact questions on the record
- ☐ Denied defense challenge for cause, all six steps before the jury is sworn: (1) clear and specific challenge; (2) peremptory used on that veniremember; (3) all peremptories exhausted; (4) additional strikes requested; (5) specific objectionable juror identified who will sit; (6) statement that the extra strike would have been used on that juror
- ☐ Granted State challenge for cause: object specifically and rehabilitate on the record; the appellate court reads the answers, and your characterization of them is what the record lacks if you stay silent
- ☐ Batson: raise before the jury is sworn and the panel discharged; get rulings at all three steps; strike sheets, questionnaires, and comparative-juror facts into the record

Main Checklist

Error Preservation

Evidence

- ☐ Timely and specific, every time; move to strike when the answer outruns the objection
- ☐ A motion in limine preserves nothing; object when the evidence is offered
- ☐ Running objection: request it and scope it (this witness, this subject, this exhibit); watch for the same evidence from another door
- ☐ Excluded evidence: offer of proof showing substance and admissibility, before the charge is read; question-and-answer form when credibility matters
- ☐ Excluding your constitutional defense evidence? Say the Constitution requires admission; the evidentiary argument alone does not preserve that claim
- ☐ Conditionally admitted evidence: calendar the missing link; move to strike when the promised connection never comes
- ☐ Rule 403 is a separate objection from relevance; request the balancing on the record
- ☐ Extraneous acts: demand notice (404(b), 609(f), 37.07, 38.37); object under 404(b) and 403 separately; force a genuine non-propensity purpose; request the limiting instruction at admission and again in the charge
- ☐ Rule 412: motion outside the jury, recorded in camera examination, sealed record, offer preserved
- ☐ Hearsay: name the statement, the declarant, and the truth it is offered to prove; count the layers, and demand an exception for each
- ☐ Confrontation is a separate objection from hearsay; make both: the statement is testimonial, the declarant is absent, and there was no prior opportunity for cross

☐ Substitute analyst: identify each report and statement conveyed; establish whether the witness performed, observed, or merely reviewed the work

☐ Experts: request the Rule 705(b) hearing before the jury hears an opinion; attack qualification, reliability, and fit as three separate showings; full offer of proof for your excluded expert

☐ Electronic evidence: name the authentication gap (authorship, account access, alteration, chain of custody, system reliability)

Main Checklist

Error Preservation

Trial Conduct

- ☐ Restraints or jail clothing: object before the jury sees anything; describe on the record what was visible and for how long
- ☐ Courtroom closure: object at the moment of closure; identify who was excluded and from what proceeding; request findings and reasonable alternatives
- ☐ Interpreter: put the language problem on the record; the court must implement the right unless the client waives it
- ☐ Judicial comments on the weight of the evidence: object (art. 38.05), and get the comment itself into the record verbatim
- ☐ Defendant's presence: note any proceeding or jury communication conducted in the client's absence
- ☐ Improper argument: object every time; request an instruction to disregard; move for mistrial; a skipped step forfeits everything below it
- ☐ Incurable harm: the mistrial motion alone preserves the complaint, and review is limited to the mistrial denial
- ☐ Bench conferences and all proceedings recorded; object to any failure to record

Main Checklist

Error Preservation

Jury Charge

- ☐ Before the charge is read: dictate or file specific objections and submit requested instructions in writing; get a ruling on each
- ☐ Preserve both erroneous inclusions and omissions
- ☐ Unanimity: multiple incidents under one count, or disjunctive offenses? Request election and a unanimity instruction
- ☐ Contested facts about how evidence was obtained? Request the art. 38.23 instruction (requires affirmative evidence putting a material fact in genuine dispute)
- ☐ Lesser-included offenses: decide, and request on the record
- ☐ Accomplice-witness corroboration instruction (art. 38.14): as a matter of law, or as a fact issue when participation is disputed
- ☐ The stakes: preserved charge error is reviewed for some harm; unpreserved charge error only for egregious harm
- ☐ Jury notes, the court's proposed answers, objections, and rulings all on the record; readback limited to the disputed portion

Main Checklist

Error Preservation

Punishment and Post-Verdict

- ☐ Full range of punishment: object if the record suggests the court will not consider it, and make the record even though the claim survives without objection
- ☐ Cumulation and stacking: object to an improper order; the claim is reviewable on direct appeal but unavailable later on habeas
- ☐ Punishment-phase extraneous acts: require proof beyond a reasonable doubt and the instruction
- ☐ PSI errors: object on the record
- ☐ Costs and fines: review the judgment; when the challenge needs facts outside the record, present them by formal bill of exception
- ☐ Motion for New Trial: file within 30 days; present within 10 days of filing; ruled within 75 days or overruled by operation of law; support outside-record grounds with affidavits and request a hearing
- ☐ Juror testimony attacking the verdict: limited to outside influence and racial animus; develop the proof through a non-juror where possible

Main Checklist

Appeal

- ☐ Deadlines run from sentencing in open court; calendar them the same day
- ☐ Motion for New Trial: file within 30 days; present it to the court within 10 days of filing; it is overruled by operation of law if not ruled on within 75 days
- ☐ Notice of Appeal: 30 days (90 days with a timely Motion for New Trial)
- ☐ Certification of right to appeal signed, and accurate?
- ☐ Trial court's permission needed (plea-bargained case)?
- ☐ Bail pending appeal?
- ☐ Designate the clerk's and reporter's records (include voir dire, bench conferences, exhibits)
- ☐ Handoff memo to appellate counsel: preserved issues, off-record events, jury notes

Main Checklist
